

View along Parramatta Lake.

## First Nations Peoples of the Parramatta River and surrounding areas

The Parramatta River Catchment Group have produced a comprehensive document about the significance of Parramatta River to First Nations Peoples and their role in caring for, and cultivating the River over many years.

You can read the full document by scanning the QR code.

Clean up at Toongabbie Creek. Note flood damage.

## Interested in joining?

The group meets every three months in a location around the Parramatta River catchment.

We discuss our experiences of running groups to support the health of the River.

The network will be organising citizen science training and projects.

This initiative is made possible by the NSW Landcare Enabling Program. A collaboration of Local Land Services and Landcare NSW supported by the NSW Government.

## Our objective and purpose

### Objective

To bring together and support environmental groups within the Parramatta River Catchment to care for Country.

### Purpose

- Work with and support Parramatta River Catchment Group (PRCG) and members
- Work to enhance a healthy, connected landscape, and promote biodiversity and ecology along the catchment.
- Build and sustain relationships with Aboriginal and Torres Strait Islander peoples.
- Support young people to engage with natural resource management.
- Research, measure and monitor on-the-ground activities to improve long term conservation outcomes.
- Share knowledge, skills and experiences among group members.
